PostSkill Task:-

1.Why is Kali Linux newbie-friendly for cybersecurity enthusiasts?

Kali Linux is newbie-friendly because it comes pre-installed with a wide range of cybersecurity tools and has extensive documentation and community support, making it easier for beginners to start learning ethical hacking and penetration testing.

2.What are the different types of Linux distros available?

Linux distros include general-purpose ones like Ubuntu, Fedora, and Debian, lightweight versions like Lubuntu and Arch Linux, and specialized distros like CentOS for servers or Tails for privacy.

3.List some security-focused Linux distros available.

Security-focused Linux distros include Kali Linux, Parrot Security OS, BlackArch, and Qubes OS.
